

Grand Opening Today

OF THE NEW AND UP-TO-DATE

PALM CAFE

The Public is cordially invited to visit our new quarters---116-118 Hotel Street, and see what a modern and splendid cafe, confectionery, and Bakery we have added to Greater Honolulu.

REGATTA IS A BRILLIANT SUCCESS

(Continued from Page 6)

Program Moves Slowly

The program took much longer this year than last, and it was 12:15 p. m. when the senior pair oar race ended. The meet, at that time, promised to continue until 5 o'clock this evening. It was freely predicted at that time, even by some old, staunch Myrtle supporters, that the Healanis would take the two remaining big events, the junior six oar and junior pair oar races. Protest Freshman Race.

Following the four oar canoe race

ond. These contestants were all natives. The winning crew finished with a lead of two lengths. Only the two crews entered the event.

Event No. 10—Junior pair oar sailing seat barge. Course, Buoy No. 10 to judges' boat.

Healanis, first; Myrtles, second.

Time, 1:30 1/2.

Kroll, who stroked the freshman six, won this event by nearly two lengths, rowing easily at the finish.

Left to right the rowers are Johnson, O'Brien, McDougal, Hough (cox), Bechert, Chillingworth and Lyle.

a dispute sprang up over the freshman six oar barge race. Rowing Captain Frank Bechert, of the Myrtles entered a protest, asserting that the red flag at the outer end of the course, which the Myrtles were required to round, had drifted out of position and was so near the spar buoy that they were compelled to round the spar buoy.

At the same time the Healanis entered a request that the event be run over, this afternoon. Bechert objected to this. Some of the judges suggested that a coin be flipped for the freshman trophy, and to this the Healanis entered strenuous protest.

The Myrtles eventually declined to submit to now the freshman race over, so that event is to be scratched off. It is stated that no trophy will be awarded.

Event No. 2—Four-oared canoe race for women. Course, from Buoy No. 10 to judges' boat.

Hualapuni, first; Good Times, sec.

SPLASHES

Eben Low made a competent announcement. He was kept busy back and forth over the course and in getting the crews out of their quarters and down to the finish line.

The crowd at the Healanis boat-house thought their favorites were in the lead of the senior race until almost the end. One of the Healanis supporters who had climbed to the top of the diving platform to see the crews all along the course was shouting down the news that the Healanis led until the two crews came opposite the boat-house, at which time the Californians were easily a length and three-quarters to the good.

Hospitality was dispensed lavishly at both the boat club quarters. The Healanis had a barge anchored just

manks of their clubhouse and nearly five hundred people crowded on it.

Jim Lloyd, coach of the Healanis, was one of the most nervous men in Honolulu until after the senior event this morning. Lloyd has worked very hard with the Blues, as has Paul Jarrett, and they were on needles and pins until the finish.

Alameda's colors were sported by scores of visitors, and nearly every San Franciscan was pulling for the Coast aggregation.

The local harbor has seldom had so many craft of all kinds. Every inch around the island was pressed

out. The Puunene stroke looked easy and powerful, and from the manner in which the Mautes started off, they seemed dangerous contenders, but they didn't have the spurt at the finish.

Not even the big intercollegiate races at Poughkeepsie, with Cornell, Pennsylvania, Syracuse, Wisconsin, Georgetown and other, equals entered, can furnish a better race than the senior event this morning. The crews were well bunched all the way and the finish was close enough for anyone.

POLICE HANDLED SITUATION WELL

While thousands of men, women and children congregated along the Honolulu waterfront this morning during the program of aquatic sports of Regatta Day, no serious accidents have been recorded at police headquarters.

Officers from the police and detective departments were distributed at all important vantage points from the Railway wharf to Fort Armstrong. At the several boat clubs, special officers looked well after the crowd gathered on the lanais and the boat piers.

At a number of the territorial wharves hundreds viewed the races with a degree of comfort not to be found at the more congested places on the water-side.

At police station, the ambulance was kept in readiness for an instant call. A detail of men was also appointed to stand by awaiting an emergency.

The policing of the shipping district on Regatta Day was a matter for much favorable comment from a host of visitors today.

COLD PLACE, EH!

The coldest inhabited place in the world is undoubtedly Verkhoyansk, in northwestern Siberia, with a mean annual temperature of less than 3 degrees below zero, Fahrenheit, and a winter minimum of the remarkable temperature of 65 below.

Every man has a job lot of relatives he doesn't like.

OFFICERS OF THE REGATTA

JUDGES—Sam Walker, C. F. Chillingworth, A. A. Wilder, E. B. Thorning (special).

STARTER—Geo. Turner.

TIMEKEEPERS—Ben Hollinger, F. C. Bailey, Gus Schaefer.

Lv L Wed on receipt of mail from

HONOLULU GIRL WHO DEFEATED COAST SWIMMER

Miss Ruth Wayson Stacker, who won the 30-yard swimming race this morning from Mrs. Terie Deach of San Francisco. Almost as much interest was taken in this as in the rowing races.

of Commercial Executives will use the headquarters of the Chamber of Commerce of the United States during their convention in Washington, September 23-25.

The second number of the Nation's Business, which is published by the Chamber of Commerce for the use of editorial writers and organizations and distributed without charge to these groups, will be issued September 23rd.

Strong protest is being made in South Australia against the continual slaughter of such rare birds as the ibis, the egret, cranes and spoonbills to supply the demands of milliners, says the Indianapolis News. The slaughter renders South Australia even more prone to plagues of grasshoppers, and is a prime cause of the decline of its fish resources. As the wading birds disappear the crustaceans that destroy fish spawn increase.
